

# Visualization (Vis)

Storytelling with  
Interactive Data Visualizations

Homework 3

—

Data

## Development Environment Setup

---

- ◆ Note that the focus of the class is on the conceptual crafting of a suitable (interactive) visualization for the given goal.
- ◆ You will be implementing/coding your visualization as part of the project (PStA).
- ◆ You are explicitly allowed and encouraged to use AI help (e.g., Github Copilot, ChatGPT, ...) for all of the coding parts, i.e. for in-class assignments, for homeworks and for the project, unless otherwise stated.
- ◆ Follow the instructions in the provided pdf file to set up and test your development environment.
